

## **WORLD WATER DAY 2023**

World Water Day, a day dedicated to recognizing the importance of clean water around the world. Clean water is essential for all aspects of life, and yet millions of people around the world still lack access to safe and clean drinking water. This year the theme of the day was “accelerating change to solve the water and sanitation crisis”.

On this occasion of World Water Day, The Department of Agriculture Engineering and Society of Agricultural Engineers at MNS University of Agriculture, Multan, organized awareness walk about accelerating change to solve the water and sanitation crisis. The event was led by Dr. Sarfraz Hashim (HoD) Department of Agricultural Engineering. Addressing the participant Dr. Sarfraz Hashim focused on the need for sustainable water management, and various solutions that can be employed for the effective management of water resources.

Dr. Mohsin Nawaz briefed about importance of water conservation the current state of water resources in the country and the challenges and opportunities for improving water resources management. On this occasion Engr. Abdul Aleem, Dr Saifullah Khan, Dr Muhammad Abid, Dr. Shazia Hanif and Dr. Umair Sultan, Dr. Mohsin Khan,, Engr Shazad Ahmed, Engr Saqib and other faculty members were also present to witness the important day.

A big number of students organized an awareness walk along with posters to raise awareness about the importance of water conservation. The posters depicted facts about water scarcity and the importance of water conservation. The awareness walk was a great success and was a great way for the students to show their commitment to preserving our water resources.

World Water Day is a reminder that we all need to do our part to ensure a future of clean and safe water for everyone. By taking action today, we can work towards a brighter tomorrow for all.
