

[2] Energy and Climate Change (EC)

[2.9] Elements of Green Building Implementation as Reflected in All Construction and Renovation Policies

Natural Ventilation, Full Day Lightening (Muhammad Nawaz Sharif University of Agriculture, Multan)

Description:

All the newly constructed buildings in MNS University of Agriculture, Multan have proper vents. All the smart buildings have approved structure from Multan Development Authority. Around all the smart buildings, green lawn and green belts have been established while approved plantation particularly of shady trees have been ensured around all the smart building and even along the boundary wall to address climate change. Our expanded blocks are under constructed & certified from PEC Green Buildings. The university has introduced the concept of Smart buildings equipped with efficient ventilation systems and surrounded by green belts and plantation for healthy environment around the buildings. All the corridors are properly ventilated and roof tops have vents for maximum utilization of day light.
